Principal Secretary to Govt. of Haryana,
Animal Husbandry & Dairying Department.

Subject: - Scheme for establishment of Hi-Tech and Mini Dairy Units for the Year 2026-27(N).

Memo

This scheme is proposed to be implemented in the State in the year 2026-27. The scheme in principle stands approved by the Government in the State Revenue Budget for the year 2026-27 for which an amount of Rs. 2000.00 lakh (Rs. Twenty Crore Only) is earmarked. It is a non-staff scheme and will be implemented with the help of the existing staff.

1. **Brief Background:-**

- Haryana has a prominent place in the livestock map of the country. The animal husbandry activities in the State play a pivotal role in the rural economy through a variety of contributions in the form of income generation, draft power, socio-economic up-liftment, employment avenues and better nutrition to human population through livestock products like milk, eggs, meat etc.
- In spite of being one of the smallest States of India (only 1.3 % of total geographical area), Haryana possesses 2.1% of the bovine population of the country and contributes 122.20 lakh tonnes milk per year which is more than 5.11% of the nation's total milk production.
- Livestock sector in Haryana contributes about 46.34 percent to the agricultural GDP of the State and 7.15 percent of the total GDP of the State. It is also a major source of round the year employment and livelihood to small farmers and marginal farmers especially the women.
- There is vast potential of self-employment generation in this sector. The establishment of dairy units can generate substantial employment (direct or indirect). There is well-knit infrastructure of veterinary institutions throughout Haryana catering to the needs of the livestock owners for providing breeding, health and related services in the State. Further vicinity of Tricity and National Capital Region having ample marketing opportunities makes animal husbandry activities an attractive option for self-employment to the unemployed in the State.
- Women are the main users and caretakers of locally adapted livestock breeds. They play a major role in conserving livestock diversity as well as in small livestock production, transformation and marketing. Despite women's substantial involvement in livestock, customary gender roles are often biased, and rural women face more obstacles than men in accessing the necessary tools, resources and services needed to reach their full potential in the sector.
- The Women's Empowerment in Livestock sector mainly focuses specifically on key areas of livestock production, such as animal health, breeding and feeding; and on use of livestock products, such as animal-source-food processing and marketing.

2. **Justification for the Scheme:-**

There are 19.29 lac Cattle and 43.68 lac buffaloes in the State as per the 2019 livestock census. According to the livestock census 2019, about 16.62 lac families are rearing one or other type of livestock in the State out of which, majority of livestock has been taken care of by women farmers. Haryana State has a vast potential of self-employment generation in the animal husbandry sector. The establishment of Dairy units can generate substantial employment and also increase in production of livestock products such as milk and other milk related products.

3. **Brief of Achievement during last three years:-**
